## CARE & WARRANTY

### Fortress Coatings Systems<sup>™</sup> Residential Warranty

With a little care your door finish will last many years with little maintenance.

With each finish there is a touch up bottle with paint. Please store in cool, dry place, out of direct sunlight.

For our Fortress Stain process you will receive two touch up bottles, a base coat color and a grain enhancement color (this hand applied finish will be unique to each door due to the nature of the fiberglass graining and hand application of the finish).

**Fortress Coatings Systems<sup>™</sup>** painted and stained doors utilize a **Sherwin Williams** industrial paint with UV inhibitors to retain the color of your prefinished door.

Finish will be warranted for a period of 1 year from date of purchase for paint adhesion and color retention.

Fortress stained doors are top coated with a UV water based clear coat. Proper maintenance would be to apply topcoat depending on weather exposure once every other year.

Prefinished door jambs should be inspected and touched up as needed, frame joints should be inspected and caulking maintained at the sill and jamb joints. Prefinishing of primed finger joint jambs will show visible joints and is not considered a defect.

Do not use any harsh chemicals on your door when cleaning; a simple solution of very mild soap and water should be used if needed.

With these few easy steps your finish will last many years.

Products manufacturers' warranty covers any defective material.
