Our trimboard is expanded cellular PVC that is superior to wood in virtually any non load bearing application. PVC Trimboard is highly resistant to moisture, rot, mildew, cupping, splitting, delamination, or warping; also resistant to insects, including termites and carpenter ants.

ROSETTE BLOCKS

These decorative corner blocks are used to dress up door and window trim. Rosettes eliminate the need for complicated miter cuts making trim installation faster and easier. Although rosettes were most commonly used with Victorian Bellyband, today they can be used with colonial or modern trim work. Our rosette blocks are manufactured to architecturally correct proportions.

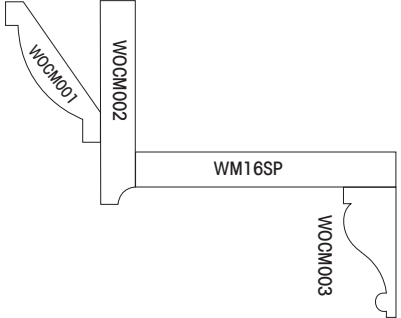

WE HAVE 5 POPLAR PROFILES IN STOCK

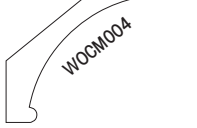

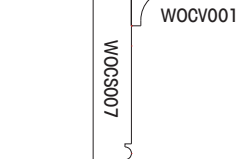

Custom rosettes are available in any size, shape or wood specie such as Red Oak, Sapele, Cherry or Maple. Call office for pricing.

WindsorONE MOULDING COLLECTIONS

The character of a fine home is defined by the design of its mouldings and architectural detail. Windsor Mill provides a comprehensive collection of period mouldings—a modern-day pattern book for architects, designers, builders, remodelers and homeowners. And like the catalogs of the past, this new collection is designed to help you choose the appropriate moulding profiles for your project.

- Cherry
- Eastern White Pine
- Birch
- Spanish Cedar
- Knotty Alder

With our in-house moulders we can mill boards to any S4S thickness or width. We utilize radio frequency gluing for wider widths.

We have 6,000 moulding knife profiles in stock. With our in-house knife grinding we can match profiles to fit customer needs.

In addition, with our flat line spray machine, we can prime any moulding or board.

Lineal foot prices may vary based on quantities due to set up charges.

FLEXIBLE MOULDINGS

DURAFLEX FLEXIBLE TRIM moulding is an easy and economical alternative for half round window and door trimming as well as curved stair wells and other radius situations where wood simply cannot bend. After Duraflex is installed and finished, its appearance is identical to wood products in that same application.

DURAFLEX is usually applied in a single piece, utilizing the continuous grain of the wood, and is flexible enough that it can be adjusted during application, assuring a perfect fit every time. The product is impervious to insects and, once installed, can withstand any harsh environment, including salt air, extreme heat, high humidity, and severe cold without the problems of warping, cracking, and rot that are common to wood products.

PAINTING - A distinct advantage with Duraflex is that primer coats are not necessary and all paints are compatible.

STAINING - A heavily pigmented stain is required. Duraflex may not absorb stain as rapidly as some wood and may require additional coats to match.

NAILING- Nails should be kept 6" apart and 3/8" from any edge along with construction adhesive. Predrilling is not necessary when using #6 or smaller finish nails.

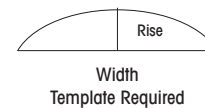

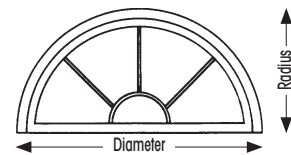

Material is less flexible when installed at temperatures below 55 degrees Fahrenheit. Before installing allow material to reach room temperatures of between 55 - 90 degrees Fahrenheit.

ASK ABOUT XXXTRA-FLEX: RECOMMENDED FOR PROFILES 6" OR WIDER, EXTERIOR USE AND TIGHT RADII

ORDERING INFORMATION

Specify pine or smooth grain for painting and pine or oak grade for staining.

- When ordering **HALF CIRCLE** radius casing, measure the distance across the opening at the widest point. This is the diameter of the circle (see diagram). To check if you are ordering for a true half circle, measure the height (see diagram). The radius (height) dimension should be one half the length of the diameter. Specify either dimension on your order.
- When ordering **ARCHES OR ARCS** (also called eyebrows or sectionals), measure the rise and width of the arc (see diagram). Specify the dimensions when ordering. Templates must be furnished when ordering elliptical and oval casings.
- When ordering **CROWN, BASE MOULDING, CHAIRRAIL, AND CORNICE MOULDINGS**, please specify the following: Radius of the wall the moulding will be installed on; whether the radius is a convex or concave curve; which edge of the moulding follows the wall; and the lineal footage of the material needed. To obtain these measurements, refer to diagram for example.
- Please refer to the detailed installation and finishing instructions enclosed in each Resinart box.

HALF ROUND CASING - SEE PRICING NEXT PAGE

CURVED CASINGS FOR HALF ROUNDS

3 - 5 DAY LEAD TIME

Our Architectural Products Division manufactures a wide variety of custom sized half round casings available in five patterns (see patterns below). The most economical product to use for paint grade casing is MDF (medium density fiberboard). Other readily available species include pine, poplar, red oak, & sapele.

EASY TO ORDER

1. Size: Inches wide _____, Inches high _____
2. Reveal: Measurement includes reveal (YES) (If NO), add 1/4" for reveal.
3. Casing Shape: True 1/2 Round *, 1/2 Round w/ template, True 1/4 Round, 1/4 Round w/ template, Full Round, Arch, Arch w/ template, Ellipse w/ template, Oval w/ template
4. Casing style: WM351 2-1/2" Colonial, WM444 3-1/2" Colonial, 3-1/2" Stafford, 3/4 x 3-1/2" S4S, 1-1/8" x 3-1/2" Windsor, Custom
5. Casing Specie: MDF, Poplar, Red Oak, Pine, Sapele,Custom
6. Quantity

- Allow 3 - 5 day lead time
- Call for quote on any diameter less than 20". Smallest radius must be no less than 10".
- Wood casings available in any profile up to 4-1/2" width. Submit form for quote on custom profiles and lead time.
- Profiles wider than 4-1/2" are available in 2 pieces across the width and can be joined in the factory or in the field. Submit form for quote.

* Check radius to be certain casing is for a true half round. Supply us a template for anything other than a true half round. Submit form for prices for templated half rounds, 1/4 rounds, ellipses, etc.

CAPTIVA CUSTOM MOULDINGS

When your project requires or deserves custom wood mouldings we have the capability with our state of the art profile knife grinder and Weinig moulder to produce the highest quality mouldings available. We are able to duplicate almost any style of moulding or with a sketch produce your own unique moulding pattern. And our mouldings are available in your choice of wood specie. With our quick set up machinery and in-house knife grinding you will find our lead times and prices able to meet most schedules and budgets.

ORDERING INFORMATION FOR CAPTIVA CUSTOM MOULDINGS

- 1) Provide a sample, sketch or WM Series pattern
- 2) Specify, moulding width and thickness
- 3) Wood specie and paint or stain grade quality
- 4) Lineal feet required
(Note 4 - 8% overrun on quantity is normal, unless we are notified otherwise)
- 5) Approximate date required. Normal lead time is 1 - 3 weeks.
Please communicate large quantity runs so raw material is available.

NOTES

- Most other species available. Call for price quote.
- Specified lengths are charged 25% premium. All orders are shipped random lengths, except FJ Poplar is shipped 16'.
- Only the best grade "FAS" hardwoods are used to manufacture our product. "FAS" however is not a clear 2 side grade. In most cases, allow between 8 - 10% waste to get cuttings that are free of end check and other allowed defects. Allow a 4 - 8% overrun.
- Lead times are generally 1 - 3 weeks.
- Priming is available.
